ABSTRACT

Managing companies is a complex process. Even more significant is effective management. Management of materials and their supply system is the main task of modern management. The role of accounting in the correct organization of the material supply system, their uninterrupted supply is great. The information obtained through accounting allows you to manage the supply chain and improve efficiency. The article compares Uzbek and international accounting practices and examines the logistics costs of procurement.

KEYWORDS: *Costs, Accounting, Logistics, Logistics Costs, Supply System, Management Report, Total Costs, Finished Product.*
