ABSTRACT

This article is about investigating and teaching methods concerning to the principles of using by teachers to enable student learning. In order to learn any language efficiently, methods are important on teaching. There are different types of methods and they have own position in teaching languages. For instance, direct method of teaching, which is sometimes called the natural method, and is often (but not exclusively) used in teaching foreign languages, refrains from using the learners' native language and uses only the target language. Teaching methods, learning styles are considered one of the main features of efficiency. The term teaching method refers to the general principles, pedagogy and management strategies used for instruction. According to the article the choice of teaching method depends on what fits educational philosophy, classroom demographic, subject area(s) and education mission statement.
