**ABSTRACT**

*The pedagogical profession differs from other professions by its characteristic features. The labor science of the educator the goal of human labor is to transform the human being, the tools of the educator's labor are his speech, his thinking, his will, his character, and so on. The working conditions of the educator are characterized by high demands on his spiritual and political image, forcing him to constantly improve, to work tirelessly on himself. A good educator will always earn the respect of his students and their parents.*

**KEYWORDS:** *Student, Educator, Skill, Demand, Knowledge, Skill, Qualification, Work.*
