ABSTRACT

Sports tourism-serves as a powerful tool for students to participate in various traditional sports holidays as well as to share their impressions. The essence of sports tourism is reflected in the content of joint activities of the reader and the teacher. The conducted experiments are perceived as a complex integrated (whole, inextricably linked) system, in which the skills and qualifications set out on the basis of educational goals are reflected by the VII-XIII grade students as a certain regulated system of elements of pedagogical activity aimed at mastering theoretical knowledge, training of ecomasiel and ecomasiel qualities in them. In this regard, it was taken into account that in order to establish a system of travel use, it is necessary to establish the eco objectives of the lessons, to choose and develop the ecomasm, to determine the methods and means of education, as well as the level of qualification of teachers in ecology, the method of assessing the achieved results.

KEYWORDS: *Necessary to Establish the Eco Objectives, Mastering Theoretical Knowledge, Training.*
