**ABSTRACT**

*Modern pedagogical technologies are "the interaction of teachers and students that allows them to master the content of learning" for all disciplines. Teaching methods should not only impart knowledge, but also influence the student's independent creative activity and broaden his / her worldview. The article discusses the use of pedagogical technologies in geography lessons and their types and methods used in teaching science.*

**KEYWORDS:** *Modern Pedagogical Technology, Modular Learning Technology, Collaborative Learning Technologies, Integration Technologies, Alternative Technologies, Problem-Based Learning Technology, Cartographic Technologies, Practical, Modern Information Resources, Virtual Multimedia, Geographical Applications.*
