ABSTRACT

Civil society is a community consisting of individuals and social objects; it is also a set of political governments that operate autonomously and are able to contribute to social relations and institutions. The acceptance of any socially important ideas always requires interaction, the exchange of different thoughts and the continuity of important balance between the collocutors. No one wants to impose his/her opinions to someone else, and no one wants to repeat someone's ideas as they are.

KEYWORDS: *Ideology, Idea, Civil Society, Social Development, Government, Society, Education, Culture, Youth.*
