ABSTRACT

Uzbekistan is a country of youth. Turning to the population, about 64 percent of the population of our country is young people, that is, those under 30 years old. Of course, this requires a lot of attention, care, if we look at the enormous responsibility of our state, on the second hand, the attention to be paid to our young people; tomorrow will bring great achievements and results. Completely changed the cultural, political-social, economic relations in the life of the country. In this article we will talk about the opportunities created for young people in the New Uzbekistan and about the youth policy in Uzbekistan in detail.

KEYWORDS: *New Uzbekistan, new ideas and initiatives, strategy of Action, National Development, Central Asia, economy, social life, political pluralism.*

INTRODUCTION

The protection of all the rights and freedoms, interests and opportunities of our youth, being the future of our country, in a modern way, in a unique way, is in fact carried out together with the times, namely in harmony, on the issue of educating our youth as a mature, educated, potential person, a perfect person in every possible way. This helps to organize distance learning and offline learning in a qualitative and continuous way. In addition, the provision of the right of young people to receive knowledge in education itself is a practical expression of the education and training and care that Uzbekistan gives to young people today.

Additional measures for the state support of young people, the state support of talented and talented young people, youth entrepreneurship, the norms for the social services of young people are reflected in the legislation. In practice, the opportunities for young people who are represented today are creativity, presidential schools, activities of specialized schools, gold, silver medals are introduced, winners of the Olympiad in science, Zulfiya, the main goal of the introduction of state awards such as "the future creator" of the "brave son", ensuring the viability and implementation of the law. The important aspect of the "state policy for young people "is that the fund was established together with the Union of youth of Uzbekistan within the framework of the state program" youth is our future " in order to create conditions for young people to engage in entrepreneurship, to protect them from the effects of various negative ills and to prevent violations. Also, the purpose of this fund is to provide preferential loans and leasing services at a rate of 7 percent per annum through commercial banks for the implementation of their ideas and projects; within the framework of the program, such privileges as granting guarantees in the amount not exceeding 50 percent of the amount of loans allocated.

Measures to create conditions especially suitable for unorganized young people, to support them in every way, to direct them to the profession and to ensure employment, to encourage their initiatives have reached a new level in recent years. Under the leadership of the prosecutors of

these regions in this districts and cities, the role of the district governor in the youth policy, the role of the heads of the internal affairs departments on youth issues, the formation of commissions for the support of young entrepreneurship with the participation of the chairmen of the district and city councils of the Youth Union Tasks for the systematic implementation of each of the five initiatives in districts and cities have been set.

In fact, the XXI century encourages you to work tirelessly on your own, it is to add innovation to the field of research, something, striving for us. I also aimed to contribute to the further development of our new Uzbekistan with new initiatives. At present, another important process of Awakening is taking place in our country. Therefore, the words "New Uzbekistan sound harmoniously and harmoniously in our lives and inspire our people towards Great Goals. It is also true that these sentences are quickly blown and mastered in our ears today. Today Uzbekistan is becoming a country of democratic changes, broad opportunities and practical work. This process is the biggest result of our reforms for me. Because, the accuracy of the goal is the most important criterion that ensures the effectiveness of actions. New Uzbekistan means, first of all, new economic relations, new economic outlook. Therefore, the economic system of our country is being fully reconstructed, no matter how heavy it may be, we have started to implement the market rules in practice.

Thus, the law "on state policy on young people" will serve to strengthen the rights and legitimate interests of young people in our country, increase the responsibility of state bodies and other organizations in the implementation of state policy on young people, increase the effectiveness of measures aimed at raising a healthy, harmonious generation in this area.

In conclusion, for the rise of national development in the New Uzbekistan, it is necessary to change the views and thinking of our people, responsible persons and leaders first. The youth of the new Uzbekistan should make a worthy use of the opportunities that are being created, and its result should bring benefits to the economy and society.. It is necessary to realize that the further development of national development in the new Uzbekistan is the responsibility of every Uzbek person on his shoulders. It is worth noting that the youth of new Uzbekistan means the future and
