**ABSTRACT**

*This article provides a number of opportunities to educate our youth in the spirit of patriotism, their confidence in the future, their contribution to our country, all of them to train worthy personnel for the future of Uzbekistan. Extensive reforms are underway. It has been widely observed that the Third Renaissance was in the hands of our youth.*

*The future of Uzbekistan is in the hands of young people!*

**KEYWORDS:** *Spirituality, Third Renaissance, Renaissance, Humanism, Dogmatism, Heresy, Period of Development, Education.*

---

**INTRODUCTION**

The issue of educating our young people, who are the future of our country, as a comprehensively mature, educated, talented person, is still approached in a unique, modern way, and the organizational and legal framework for protecting all their rights, freedoms, opportunities and interests is constantly improving. . We must, of course, apply the knowledge we need to teach through modern innovation and use it only wisely. Not only do we need to do all the goals for our young people, but we also need to be able to control them and set an example of today's results and achievements.

**METHODS AND LEVEL OF LEARNING**

The first President Islam Abduganievich Karimov said in his book "High spirituality is an invincible force" about spirituality: -the incomparable power that awakens his faith is the criterion of all his views" [1; 13-p]. It is obvious that the more spiritual a person is the more beautiful and meaningful his life will be. We also need to raise the morale of our young people for the benefit of the future. In particular, a number of reforms are underway. We are now reforming all aspects of education. Where there is no knowledge, there is backwardness, ignorance and misguidance. A number of presidential decrees and resolutions have been adopted to develop the field of public education, increase the prestige of teachers, educate the younger generation with intellectual

potential, modern knowledge, and impart knowledge. All of them are gradually being implemented and practical results are being achieved. Our first President said: "Reform must serve man, not for reform, but for his well-being" [1, p. 66]. We often say, "We are unorganized youth, unorganized youth." But when it comes to resolving this issue legally and practically, we have to be clear, most of us don't know what to do," he said. History has shown that many of our scholars contributed during the great Renaissance. These periods later became known as the First and Second Renaissance. To date, this renaissance period has entered its third phase. Now we come to the part where we talk about the middle ground and the origin of the word Renaissance.

**Renaissance** — Central Asia, Iran, China (9th-12th and 15th centuries), a period of distinct cultural and intellectual development in Western Europe. The term "Renaissance" was originally used to refer to the cultural upsurge in Italy (14th-16th centuries), a period of transition from medieval stagnation to a new era. The main features of the Renaissance are: the glorification of man (see Humanism), the unleashing of his talents and intellectual potential in thought and science through the breakdown of dogmatism, ignorance and bigotry; return to the culture of the ancient period (Greek) and restore it, enrich it; to get rid of the scholasticism of the church, to sing the songs of worldly beauty and life in literature and art; human freedom is the struggle for freedom. [3]

Recently, the term Third Renaissance has been on the agenda in Uzbekistan. So how do you do that? When was the first and second Renaissance in the country? President Shavkat Mirziyoyev made this clear in his speech at the October 1 Teachers 'and Coaches' Day ceremony.

"We have set ourselves the main goal of creating a new Renaissance in Uzbekistan, the Third Renaissance, through large-scale democratic changes, including educational reforms. Speaking of which, first of all, the essence of the Third Renaissance must be deeply understood by each of us, by our whole society.

Historically, our homeland, located at the crossroads of the Great Silk Road, has long been one of the centers of high civilization and culture. The rich scientific and cultural heritage of our people, ancient stone inscriptions, priceless architectural monuments, rare manuscripts, various artifacts testify to the deep roots of our three thousand years of statehood," Shavkat Mirziyoyev said.

## RESEARCH RESULTS

During the first and second renaissances, our great scientists made great contributions and scientific works. In the future, our youth must do this. Because the great Third Renaissance remained in the hands of our youth.

It is no coincidence that the head of our state said that the foundation of the Third Renaissance will be the youth. In order to lay the first foundations of the "Third Renaissance", starting from the "Year of Youth Support" in 2021, every year a competition of projects "Third Renaissance - in the eyes of young people" was organized among students of higher education institutions. In this competition, students will learn "Innovative approaches to the study and promotion of ancestral heritage", "Ways to change the educational process and methodology to increase personal motivation (interest) of students in quality education in higher education", "Innovative methods of attracting young people to science" [4]. The purpose of this competition is to train young, competitive personnel for society and the state, to educate young people in the spirit of patriotism, to increase their intellectual potential, to identify talented students in higher education, to create opportunities for them to show their potential, to form public devotion. , to increase and encourage student prestige [5]. The Third Renaissance serves to lay the foundation for a new era of our national development."If we value science and education, and create an environment in our country through the study of science and education, we can build a life and future worthy of our ancestors!" - Sh.M.Mirziyoyev.

Most young people do not know that in this sacred land where we live, Europe was still in a deep sleep at the beginning of the Renaissance. Perhaps there are those who do not even know that this historical fact has been acknowledged by the leading scholars of Europe. In any case, the concept of the "Muslim Renaissance" by the famous German orient a list Adam Mes, and the "Renaissance of the East" by academician Nikolai Conrad did not fall from the sky. If we consider the book "Die Renaissance des Islams" as the main source on this topic, we can be proud that the great scientist Adam Mesdek relied on the scientific heritage of our great compatriot Beruni in the creation of fundamental research [6]!

Hundreds of scholars, such as Ibn Sino, Musa al-Khwarizmi, Abu Rayhan Beruni, who grew up in the famous Ma'mun Academy, contributed to the first stage of the Eastern Renaissance, and the second stage of the rise of the Timurid civilization - Mirzo Ulugbek, Alisher Navoi, Zahiriddin Muhammad Babur. It would be great if the representatives of the Renaissance grew up among the children of New Uzbekistan, who enjoyed the fruits of today's reforms!

## CONCLUSIONS

In short, as we create the future of a new Uzbekistan, it is in the hands of all young people and us. We will use the opportunities to develop the future of our country. We will be worthy children of our ancestors, our first President, the founder of the great independence. At the moment, our young people are given all the opportunities, and all this is done with a vision for the future. After all, our generations should live in better conditions than us, in a better time than us. Our first President IA Karimov also said: "Our children must be stronger, wiser, more educated and, of course, happier than us" [7]. Of course, all this is an effort to develop the future of our country. In order to raise the flag of our country, it is necessary to take more serious measures in the upbringing of children, to be engaged in their education, taking into account their existing opportunities, to control how they use the given opportunities, creating all favorable conditions. And demand is one of our primary responsibilities.

The future is in the hands of young people. May our independence last forever?
