ABSTRACT

The article discusses the role and peculiarities of the paraphrase in English fiction. The article also provides information on the use of paraphrase in fiction as the most complex form of linguistic unity, its intended purpose of expression. A paraphrase is a type of trail, a descriptive turn in which the name of an object is replaced by an indication of its features. It is used to avoid repetitions, to indicate the characteristic features of what is replaced, to give greater expressiveness to speech.

KEYWORDS: *English, Fiction, Paraphrase, Linguistic Unit, Author Purpose, Expression, Purpose.*
