INTRODUCTION

Ensuring public order and security, human rights and freedoms, protecting the legitimate interests of society, the state and the individual from any threats are key factors of peace and tranquility, interethnic harmony and sustainable development in the country. "Preservation and strengthening of peace and security, civil and interethnic harmony and solidarity in Uzbekistan should remain our most important and decisive task" [1].

As a result of reforms in Uzbekistan in the judicial system, in particular, in the system of internal affairs and increasing the activity of civil society institutions in public administration, a new system of crime prevention has been formed and is functioning effectively in the most remote and remote villages of the country. Today, in order to further increase the effectiveness of the existing capabilities of this system, work is underway to further deepen the reform of the system of preventive services of law enforcement agencies. Law of the Republic of Uzbekistan "On Internal Affairs" of September 16, 2016, PF-4947 of the President of the Republic of Uzbekistan dated February 7, 2017 "On Strategy for further development of the Republic of Uzbekistan", dated April 10, 2017 "On the effectiveness of law enforcement agencies Decree No. PF-5005 of April 12, 2017 "On organizational measures to further improve the activities of law enforcement agencies" No. PQ-2883 of May 1, 2017 "On measures to radically improve the activities of law enforcement agencies in the field of maintaining public order and ensuring public safety" No. PP-2940 of August 16, 2017 "On training of law enforcement officers," radically improve the system of retraining and advanced training Resolution No. PQ-3216 "On measures to increase [2.5-6] and As a result of the measures taken in the country to ensure the implementation of other normative and legal acts in the field, it can be seen that high results have been achieved in the field. In particular, this year, all regional police departments of the country are taking measures to prevent crime. In particular, in Fergana region, as a result of measures taken at the initiative of the

Department of Internal Affairs in the surrounding districts and cities, the number of offenses has decreased. In particular, in Fergana region in 2021 the number of reported crimes of all types amounted to 5172, in 2022 - 4828, a decrease of 344 or 6.65% [3].

Preventive inspectors, the main directions of the legal order, and organize reports, performing roundtables, video clashes, showing round tabling, and broadcasting, It is also the implementation of preventive measures, such as the organization of routine directions in crowded areas of the population and the active internships, and preventing the administracting area. It should be noted that the implementation of legal advocacy and new laws of the administrative territory and the new laws of the Republic of Uzbekistan, presidential decrees, and the decisions of the Cabinet of Ministers is one of the important tasks. As a result of the reforms in the settlements, ensuring public order, protection of criminality, anti-criminality, to a new system that meets the lifestyle, spirituality, values and mentality of our people, That is, the basic stations of the police were founded. They focus on every neighborhood, township, villages, and villages, and special attention is paid to piters of prevention inspectors. Over the years, the activities of the base points and the legal, organizational, methodological, material and personnel system of cooperation were formed. The a number of normative legal acts served to organize and manage the activities of the table have been adopted and implemented in the life of society. As a result, the specific order and principles of their activities have decided. The material and technical base and infrastructure of the base points is improving year by year. They are also being tested to provide them with qualified specialists, to improve the quality of this work. As a result, today based points has become a major area of law enforcement and public safety in neighborhoods, villages, towns and villages. In them, the staff of the law enforcement officials are working in close cooperation with the employees of the relevant field services, with each other, other public structures and other public structures of state power. The infrastructure of the base points provides for the influence of minors and young people's spirits, the commission of different negative streams in neighborhoods.

As a result of work in this regard, about the average twenty percent of our country's neighborhoods have been allowed at the time of the average twenty percent. Also, as a result of the joint work, the share of severe heavy and severe types is declining in all crimes. In particular, the country's severe crimes in the country accounted for 11.7% and severe crimes, and in 2016, these figures are 3.99 and 11.38%, respectively. made. When achieving such results, of course, the role of the base operating in the country is also large. Nevertheless, there are also cases of inconsistencies in the activities of the industry. In particular, today the system of internal affairs are not systematically designed to identify the prevention and anti-crime measures to identify and eliminate the conditions and the conditions for the offenses, as well as violations, as well as violations. Showing a number of problems and shortcomings in the organization of organization and management of their activities [4.7]

Therefore, on measures to strengthen the efficiency of the President of the Republic of Uzbekistan " The following severe deficiencies and problems accumulated in the activities of the affairs are fully complicated to the field of violations and the management of basic centers and prevention inspectors and is not clearly distributed between the interior parts of the middle and lower joints makes the priorities of an employee difficult to determine the priorities of the case for the final result of the work;

Second, the fact that the current organization of existing and medium services is not sufficient, while certain cases in the central and medium services are not sufficient and surplus state units, the lower compartment is the responsibility of the lower compartment;

Third, law enforcement officials, including law inspectors, are low, and the culture of citizens remains low, the solution of the most important problems of the population is not ensured effective cooperation with other civil society bodies;

Fourth, the appeals of individuals and legal entities are subject to superficial analysis, which is being raised not only in thoroughly analysis, forcible analysis of citizens to apply to the President of the Republic of Uzbekistan to apply to public recipients and other organizations; Fifth, the effective system of officials of law enforcement officials in public, their activities, does not have the introduction of the public, parliamentary and parliamentary control, which does not allow employees to effectively perform the tasks assigned effectively;

Sixth, work on the prevention and prevention of delinquency, is not being taken systematically and efficiently on the early prevention, detection, and elimination of the conditions for which violations and conditions for which they are allowed;

Seventh, attention is not enough to protect the younger generation from corrupted ideas, first of all, in order, law enforcement and religious extremism is not sensitive;

Eight, the system of training, retraining and advanced training of law enforcement officers does not meet current requirements, and the cases of bribery and service positions are still confronted;

Ninth, the system of introducing the latest information and communication technologies in the system, the level of equipment of the police remains unsatisfactory [5].

In addition, there are also issues related to the occupational training inspectors of the police station, where the maintenance inspectors in the base, which are effective organization of the activities of the most employees, to maintain the prevention of the public, maintain public order, and ensure the safety of citizens, administrative Demonstrated in the requirements of demand for criminal-procedure and criminal penalties, in this area on the basis of other sectoral services, public organizations, government agencies, government agencies, government agencies, government agencies, government agencies and institutions. will be. One of the main factors in these issues is that there are insufficient training, practical and methodological manuals that serve methodological inspectors of prevention inspectors.

Therefore, special attention is paid to the prevention of the Crime or Carmitrality, Colidation and Public Procedure for the prevention of the President of the Republic of Uzbekistan (February 7, 2017) Focus is set [6].

However, despite this, the problems cannot be eliminated in this area. Because as Jamaya is renewed and grow, problems will also be renewed. For this reason, the development of new mechanisms for the prevention of offenses and the population and the constant control and constantly monitoring and the narrative organization of multipalactic events in the narrow range is required.
