ABSTRACT

In this paper, In developed countries, Europe, the Americas, Oceania, local governments are talking about the stages of control over the implementation of management decisions.

And an attempt was made to analyze the data based on the necessary clear facts. The author has tried to gather information on these topics through several articles and official emails from relevant authorities.

By getting that paper reading we get familiar with debates on challenges and tools for monitoring and evaluating support of decentralization and local governance.

- *Get tips on how to use PM&E tools for strengthening the capacities of stakeholders of decentralization at the national and local level and strengthening accountability systems at the municipal level.*
- *Exchange on their own experiences with supporting the design and implementation of M&E systems*
- *Discuss challenges encountered when assisting partners with the design and implementation of M&E systems and M&E capacity building, including lessons learned.*
- *Exchange on possibilities and obstacles to move towards joint/harmonized approaches.*

KEYWORDS: PM&E tools, M&E system, Joint. Harmonized, Decentralization, Strengthening accountability.
