**ABSTRACT**

*In order to increase the employment of the population, in order to increase the real money income and purchasing power of the population, to further reduce the number of low-income families and the level of differences in income, to create new jobs, to reduce unemployment in our country, and to increase the employment of the population with socially necessary labor. The possibilities of use for reproduction are highlighted.*

**KEYWORD:** *Family business, socio-economic development, income, owner, manager, projects, initiative, economic reform.*
