**ABSTRACT:**

*Astrology, an ancient belief system deeply embedded in Indian culture, has been a significant cultural and spiritual practice for millennia. In recent years, there has been a noticeable surge in the interest in astrology among tourists visiting India. This paper aims to explore the influence of astrology practices on tourism in India. Through a multidimensional analysis, it examines the various aspects contributing to this phenomenon, including the historical significance of astrology in India, the proliferation of astrology-related services, the rise of astro-tourism, and the impact of digital platforms in promoting astrological tourism experiences. Drawing on both qualitative and quantitative data, this study sheds light on the motivations of tourists seeking astrological experiences in India, the economic implications for the tourism industry, and the challenges and opportunities presented by this emerging trend. Furthermore, it discusses the implications for cultural exchange and the commodification of spiritual practices in the context of astrological tourism. Ultimately, this research contributes to a deeper understanding of the intersection between astrology, tourism, and cultural heritage in India, offering insights for stakeholders in the tourism industry and policy makers alike.*

**KEYWORDS:** *Astrology, India, Tourism, Astro-Tourism, Cultural Heritage, Spiritual Practices, Cultural Exchange, Digital Platforms, Economic Implications, Cultural Tourism.*
